

## Visibility

Be transparent. Give thought to what needs to be discussed in front of the patient (and what doesn't)

## Permission

Request permission to approach the patient, always try to do so with their consent. Keep a respectful distance.

## Explanation

Provide explanation about each interaction. *What is happening and why?*

# Perception and Awareness

## Repetition

Repeat information as often as necessary. Confirm understanding.

## Orientation

Orient to place and person. *Who you are and what is your role?*

## Reason

Explain what you would like to talk to the patient about and why.
