

- 1 Gastrin secretion is inhibited by**
- A Calcium
 - B Amino acids
 - C Adrenaline
 - D Vagal stimulation
 - E Calcitonin
- 2 Actions of gastrin include all of the following EXCEPT**
- A Increased lower oesophageal sphincter pressure
 - B Reduced gastric motility
 - C Secretion of acid
 - D Secretion of pepsinogen
 - E Secretion of insulin
- 3 Actions of CCK include all of the following EXCEPT**
- A Increased gastric emptying
 - B Increased gut motility
 - C Gallbladder contraction
 - D Secretion of insulin
 - E Secretion of glucagons
- 4 Which of the following is secreted by S cells of the intestinal mucosa**
- A Gastrin
 - B CCK
 - C Secretin
 - D GIP
 - E VIP
- 5 Regarding the stomach**
- A The stomach produces 1500ml of secretions per day
 - B Minimum pH is 2.3
 - C Intrinsic factor is produced by chief cells
 - D Pepsin is the only enzyme produced by the stomach
 - E Acid secretion is inhibited by prostaglandins

Q	A
1	E
2	B
3	A
4	C
5	E
